Forecast for Sunday 23 Jun 2024

Weather: Widespread low cloud with patchy light rain and drizzle at first. Becoming dry this morning, with the cloud lifting and then breaking through this morning to allow increasing amounts of sunshine. Sunny this evening and clear overnight.

Chance of cloud-free hill tops above 800m: Likely near-nil at first (except perhaps some higher peaks at times), improving to 60% by midday and then 100% by evening.

Low Cloud and visibility: Low cloud with bases around 300-400m blankets much of the park at first, perhaps with one or two of the highest peaks standing above the cloud top at times. Cloud lifts this morning and breaks this afternoon. Visibilities very poor in low cloud and drizzle, gradually improving through the morning. By afternoon, visibilities expected to be very good.

Meteorologist's View

Note the high UV index and higher humidity than of late, with conditions through the morning not reflective of the whole day. Make sure to pack extra water and sun protection if out during the afternoon.

Forecast for Monday 24 Jun 2024

Weather: A bright and sunny start to the day, clouding over into the afternoon but this breaking up into the evening to give some late sunny spells.

Maximum wind: Generally southwesterly winds around 10-15 mph gusts 20-25mph.

Chance of cloud-free hill tops above 800m: 100% throughout for most, perhaps dropping to 90% for highest peaks during the early afternoon.

Low Cloud and visibility: Cloud generally staying above summits throughout the day. Visibility likely to be very good.

Temperature: **Valleys:** Plus 13 Celsius, rising to Plus 21 Celsius.
At 800m: Plus 11 Celsius, rising to Plus 16 Celsius.
Freezing level: Above summits.
